

## Energy Efficiency Pilot Program Savings Summary

---

Type of Business:

School

---

Number of Locations:

1

---

Number of IntelliHVAC Devices:

20

---

Engineering Consultants:

Tower Engineering

---

Average Annual IntelliHVAC Reduction:

\$1,953.57

---

Total Annual Cost Reduction:

\$39,071.40

---

Project ROI:

7.2

---

## Madison Energy worked with the American School for the Deaf (CT) to reduce energy costs by \$39,071 annually

---

Madison was able to prove the results of the project with the following process:

- Connected EKM meters to record baseline energy consumption
  - Install IntelliHVAC and record performance energy consumption
  - Download data and export to 3<sup>rd</sup> party engineers
  - Results were weather normalized and extrapolated
- 

### How It Works:

# intelliHVAC

Retrofits to 24V terminal and reduces energy via efficient fan control and compressor cycling. Variable timing on the post purge fan captures latent energy while intelligent cycling reducing unnecessary compressor run-time. Energy reduction 10-30%. Lifetime warranty.
