

Overview:

IntelliACC is the single most effective energy control system for commercial HVAC. It uses photonic programming to effect VFS (variable fan speed) along with MSST (motor soft start technology) that allow it to reduce energy (kWh) and reduce noise (DB) by 20-40%. IntelliACC's AI learns and adjusts on a continual basis, based on climate conditions and system settings, guaranteeing to optimize performance.

Summary:

12-18 Month ROI

- Guaranteed to Reduce Energy Costs 20 – 40%
- 20-30% Compressor Cycle Reduction From De-stratification
- Extends Life of Equipment
- Variable Fan Speed and Technology
- Motor Soft-Start Technology
- Artificial Intelligence Built in
- Improves Dehumidification
- Reduction in Peak Demand
