

IntelliPTAC was developed for PTAC systems as an extension of the IntelliHVAC. It uses the same overall technology and is modified for PTAC units and the smaller spaces they serve. Like IntelliHVAC, IntelliPTAC puts a variable timing mechanism on the post purge fan with the varying lengths of run-time depending on the overall compressor run-time. It also cycles the compressor after extended periods of run-time in order to save additional energy.

## Overview:

- Guaranteed to Reduce Energy Costs 10 – 15%
- Prevents Wear and Tear
- Extends Life of Equipment
- 18-Month ROI
- Reduced CO2 Emissions
- Three Year Warranty
